

There's Another Way an Aircraft Loses Value.

Just lose your maintenance logbooks.

You have insurance on your aircraft, but your logbooks and any diminished value resulting from missing or incomplete logs **are not covered**.

Industry experts estimate a diminished value of 20% to 50% or even more if aircraft maintenance logs are missing or incomplete.

Your risk management strategy should address your maintenance logs, **"the single most expensive and vulnerable unofficial part of your aircraft."**

Summer 2005*

Where are Your Logs?

Let WebSafe help eliminate the threat of missing logbooks. Our experienced personnel will come to your facility, scan your existing logs, and store them on secure WebSafe servers.

You can view your logs from anywhere in the world using the Internet to access your WebSafe.

Keep up with future maintenance by easily uploading new maintenance records into your WebSafe – the physical and electronic logs will always be synchronized.

What would you do if your logs were lost? Let WebSafe eliminate this very real danger.
